

Statement of participation

Hugo Almeida

has completed the free course including any mandatory tests for:

Galaxies, stars and planets

This 8-hour free course provided a general introduction to many aspects of galaxies, stars and planets.

Issue date: 28 June 2026

www.open.edu/openlearn

This statement does not imply the award of credit points nor the conferment of a University Qualification.
This statement confirms that this free course and all mandatory tests were passed by the learner.

Please go to the course on OpenLearn for full details:

COURSE CODE: S177_1

Galaxies, stars and planets

<https://www.open.edu/openlearn/science-maths-technology/galaxies-stars-and-planets/content-section-0>

Course summary

This free course, Galaxies, stars and planets, is a general introduction, including scale of the universe from the very large to the very small; orbits and gravity; the Solar System; the Sun and other stars; galaxies and the composition of astronomical objects.

Learning outcomes

By completing this course, the learner should be able to:

- understand the scale of items within the Universe
- appreciate the wide variety of objects contained in the Universe
- understand the relative sizes of the planets within the Solar System
- calculate how long it takes for light to reach the Earth from the Sun.

Completed study

The learner has completed the following:

Section 1

The Universe today

Section 2

Scale of the Universe

Section 3

Orbits and gravity

Section 4

Our neighbourhood

Section 5

The Sun and stars

Section 6

Galaxies

Section 7

'We are stardust'
